Technical Seminar

Floor Screeds:

An essential update for professionals

Who should attend:

- Design Engineers
- Main Contractors
- Specialist Sub-Contractors
- Site Supervisory Personnel
- Ready-mixed Concrete Producers

25th October 2022

*A half-day online seminar examining floor screed types,
specification, and installation*

www.concrete.ie

Introduction

Screeds can often be viewed as non-structural, straightforward elements which do not require consideration, leading to avoidable problems.

There are a variety of screed materials now available that require very specific types of installation. A lack of knowledge by professionals can lead to issues such as: screeds being specified that are not adequate for the intended use, inappropriate or inadequate installation, or systems that cannot be installed in the required time.

Delivered by experienced industry professionals, this seminar provides guidance on important design and specification considerations, in addition to installation best practice, and finishes.

This seminar is an essential update for all those who design, specify, install or supply quality floors in Ireland.

Seminar Programme

10.00 Welcome and Introduction

10.05 Specifications and Codes of Practice

Thomas Holden, Roadstone

10.45 Screed Types and Application

Padraic McGrath, McGraths Cong

11.20 Break

11.30 Installation
